

Review Panel: 18/8/10

Review paperwork suggests that there is now a NVQ available in Custodial Care. This is clearly not required at the point of recruitment, nor is it stated that the postholder would be released if he/she fails to meet the assessment criteria.

Review panel therefore uphold original level 2 awarded.

Panel Notes

9/11/2022- Panel considered NVQ level 3 as required for the job as job description states the post holder has 18 months to achieve this.

Questions posed to job advisor:

"In original job description, there is no formal qualification requirement. How has the role changed"?

Response: "We offer SVQs now. Jobs/job descriptions have not been changed."

Do you consider the minimum qualifications required for this post to be a SVQ3?

"Generally something the postholder would work towards this in the first year"

28 Jan 2022

- An SVQ level 3 in custodial care is desirable but must be completed within first 18 months of employment
